More details on back

Created by a Florida Education Panel including National Board Certified Teachers

Test Tools has the Largest Software Installation Base for FCAT Preparation

The FCAT Simulation software content was purposely written based upon item specifications and released FCAT test questions. This is not recycled material from other products but true simulation software.

With *Test Tools*, students can prepare for the FCAT at their own pace to match their learning style and study techniques. There is also in-depth material in the software teaching students valuable skills about what they need to know in preparation of the FCAT – this includes types of questions, calculator usage, passing scores, how to get ready, and more.

Additional Features:

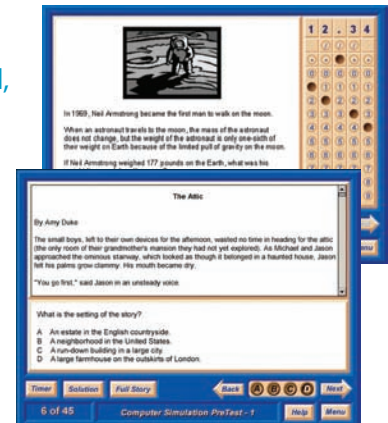

- 45-Minute software training video
- Orientation Guide to FCAT
- FCAT Benchmarks Review
- Mathematics, Reading, and Science Benchmark Assessments
- Test Taking Tips
- FCAT Computer Simulations
- Student Grade Summary
- Test Bookmarking
- Network Installation
- Take Home Policy

"The FCAT Simulation is the most realistic FCAT preparation software available. Our students love it! Our teachers love it!"

– Scotland Elementary School, Lakeland, FL

"Students thought that this software was more effective than others because it more closely related to the actual test."

– Miami Sunset Senior High School, Miami, FL

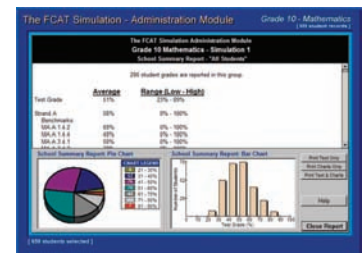

Administration Module

The Administration Module is a Windows ONLY add-on that will provide several administrative features for the software such as:

- Modify/Delete Student Records
- Assign Student to Groups
- Detailed Reports for a Student or Group
- Student Rankings
- Graphical Displays of Data
- Printable Student Reports

The Administration Module works for all grades and all subjects of *The FCAT Simulation*.

Test Tools, Inc. Sales Policy

Test Tools, Inc. is a "Sole-Source" distributor for all of their products and is an approved vendor of all 67 Florida school districts. Test Tools accepts school or district purchase orders (PO's), checks, and credit cards. All Test Tools, Inc. software products are priced "per school" and are only offered to schools and school districts (not individual parents or students)

The software products are only available as combined Windows and Macintosh site license agreements. The site license entitles an individual school to install the software on an unlimited number of computers within the school property. The software can be installed on a network or individual computer workstations. This "Student Friendly Software" also allows all registered students and all faculty members to use the software on their home computer systems as part of our take home policy.

The video products are supplied on VHS tapes and only allow the broadcast to teachers, students, parents, and administrators within the school. The videos cannot be broadcast on district television stations unless the district purchases a district license. All registered students can use the videos and all faculty members at home as part of our take home policy.
